

ProducepakQI

BESPOKE QUALITY SOLUTIONS

Fresh produce * Food service & manufacture * Meat packer

 **NEW ANDROID APP**

Reduce inspection costs

Eliminate mistakes & waste

Make price negotiations easier

Maximize quality & consistency

Integrate QC throughout business

Bespoke quality solution benefits:

Reduce quality inspection labor costs

Reduces time taken to perform quality inspection tasks, reduce labor costs, and improve productivity.

Reduce fresh produce/food waste

Reduces waste & shrinkage through better communication across levels of management, and rapid response to quality issues before they result in waste.

Consistent quality control for better quality food

Guarantee quality and consistency with flexible quality inspection systems that guide team members through each quality incident to ensure easy & accurate compliance.

Hand crafted to be a perfect match for your business

Your quality control solution is tailored by your consultant to support your business, create new efficiencies & opportunities, save everyone time, increase accountability, and reduce waste. A truly bespoke solution.

100% accurate & fast dispatch/export QC

Ensure accurate and rapid quality inspection at the point of dispatch/export or container loading; ensuring customer satisfaction and reduced customer rejections.

Reduce administration & compliance costs

ProducepakQI will become part of your SOP, reducing the cost of QMS maintenance & compliance by automating many of these requirements.

Bespoke quality solutions

*Your **quality control consultant** will tailor ProducepakQI to match your precise requirements.*

Bespoke quality programs, tests for QMS

Tailored reporting & labels, and dashboards

Start using your solution within 24 hours**

Privately trained AI dataset* (option)

Integrate with other apps, finance, equipment

ProducepakQI

Bespoke quality solution features:

Unlimited quality inspection programs

The app can be configured with unlimited quality inspection programs / tests: tests can be internal, required by your customers, state/federal, or QMS related.

AI powered QC

Optionally use A.I. powered quality inspection for rapid quality control with fewer errors and consistent QC. Our A.I. model is constantly evolving and improving with every inspection.

QC dashboards & QC labels

Instantly turn your inspection data into useful information, analyze supplier performance, your packing/manufacturing quality, and other quality inspection KPI's. Print user designed labels directly from ProducepakQI.

Smart interfaces for easy inspections

Capture data rapidly, no need to have all data pre-defined in a database (eg: enter a new supplier name into a test, then use that supplier in future tests). Smart defaults avoid user repetition during inspections.

Alerts keep everyone instantly informed

Automatic alerts for each different quality inspection program determines which team members (or suppliers) will receive instant quality alerts (photos and attachments included).

Customer satisfaction management

Measure customer complaints, their severity, frequency, track back to suppliers, and measure overall performance at filling customer orders, instant recall of customer incidents during sales and more...*

Supplier quality management

Suppliers must know your business is measuring their performance accurately. Any trends that affect the quality of fresh produce can be quickly detected and management automatically alerted.

Perform tests offline

Unlike other apps, ProducepakQI allows you to perform tests offline when you have no internet*. Tests are later synced to the server so your team can access them.*

Business wide quality control integration & API

Upgrade at any time to Producepak Fresh Produce / Food Service / Meat Packing to allow business wide integration of QC & traceability into all facets of the business or integrate with finance and hardware.

Bespoke inspections!

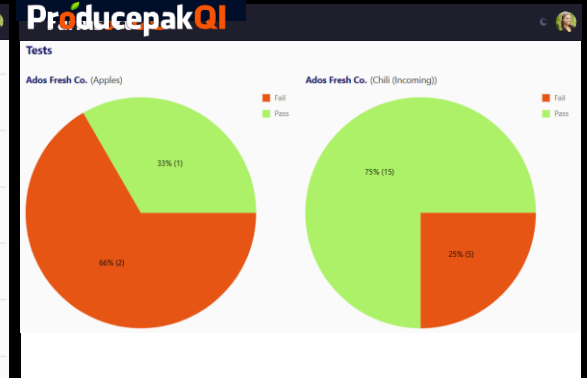

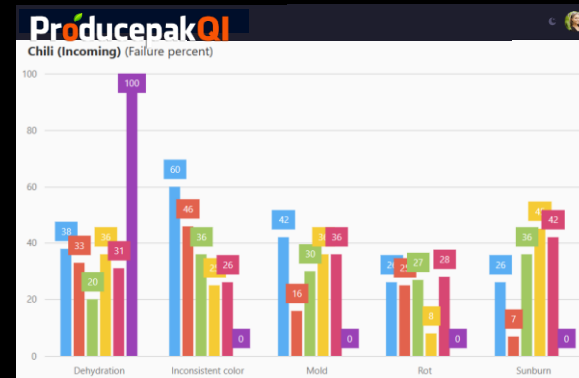

Inspect unlimited commodities, using unlimited quality programs.

Request new quality analysis reporting tools to suit your quality trend analysis requirements.

Reports and Quality Dashboard tailored to your exact requirements by your solution consultant.

Supplier quality management & analysis

Simple or comprehensive supplier quality management using unlimited quality programs which can be supplier specific, fresh produce variety specific, or generic for all suppliers. Each supplier quality program records notes, photos & documents, can be linked to delivery, shipping container, batch, order, pallet, etc. Share quality results directly from the app with your suppliers & team. Automatic alerts if a test fails.

Customer quality feedback management

Customers provide online comments, photos, documents, or fill out feedback forms. Trace customer complaints back to supplier, or to the origin crop/field/patch. Analyze customer complaints, complaint resolution and corrective actions. Instant recalls.*

Costa Rica Fruit Co, Walmart 2.2Lb/1kg Bag

Date	Test No	
May 10	118	Customer Walmart. Credit added to customer account.  175  6 Invoice #3 Inventory created by: B. Smith Jun 29 11:37 AM Test by: F. Support2 May 10 10:...

Instant enterprise wide alerts when there is customer feedback, automatically sent to relevant team members.

Negotiate better prices...

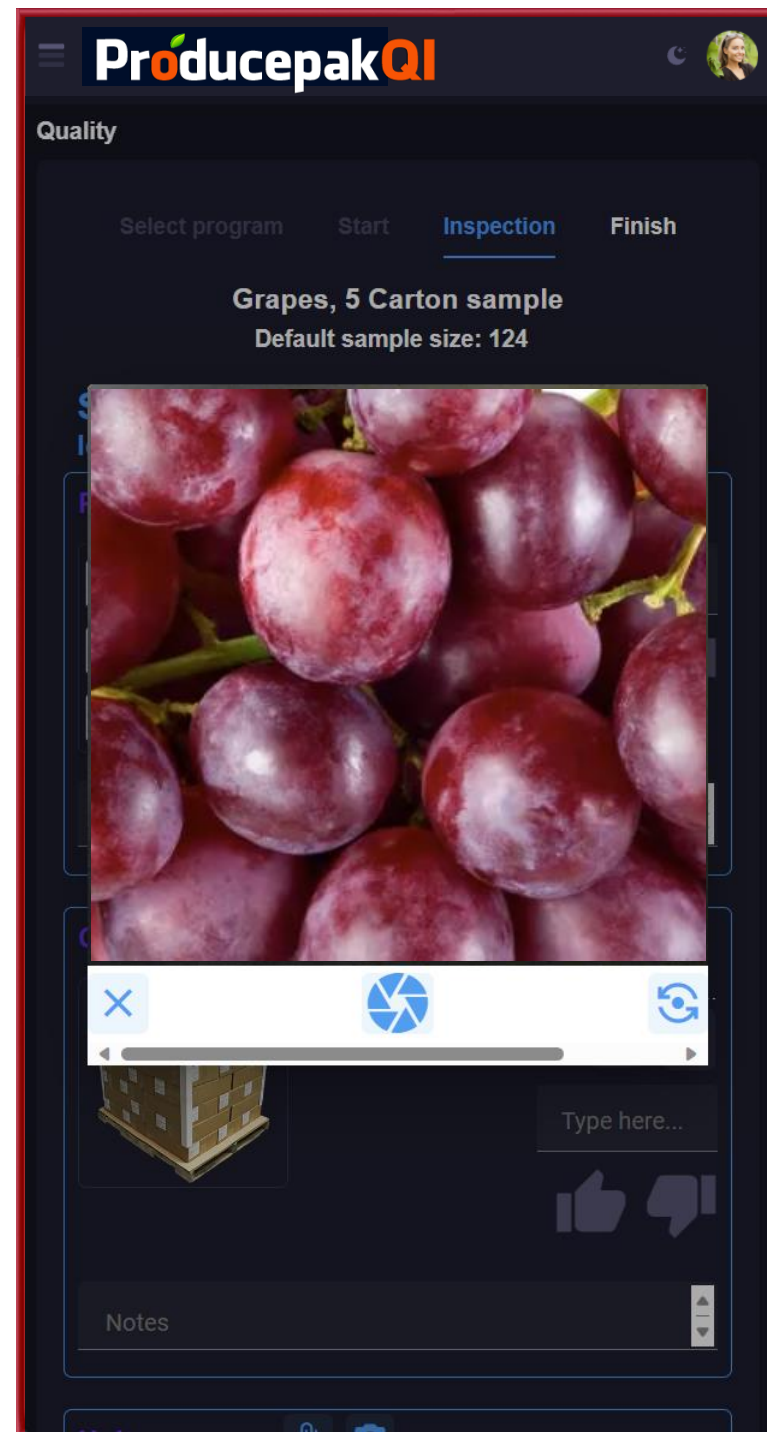

With instant access to inspection info & unlimited photos.

Increase inspection consistency...

Using inspection templates, and optional AI powered inspection for rapid consistent results.

Better visibility & greater insights...

Convert data into actionable & understandable info for better decision making, quality dashboard and data analysis.

Flexible quality inspections

Pass / fail

Simple pass or fail criteria allows rapid visual or A.I. assessment, simply tap thumbs up or down to complete the criteria for a rapid inspection.

Percent of sample

Take a sample weight of the commodity and measure weight of defects to have automatic “out of spec” sample calculated.

Score

Addition/deduction scoring system to determine an overall quality score. Set ranges and color codes that determine Class or overall quality.

Value range

Selected criteria must have results between a specific number range, for example “Sugar content” must be between 45 and 55 otherwise the criteria fails.

Bespoke quality solutions

The screenshot shows the ProducepakQI mobile application interface. At the top, there's a header with the logo and a user profile icon. Below the header, the word "Quality" is displayed. The main form has a progress bar with three steps: "Select program", "Start" (which is highlighted), and "Inspection". Below the progress bar, the text "Grapes, 5 Carton sample" is shown. The form contains several input fields: "Date" with a calendar icon, "Grower" with a dropdown menu, "Supplier / exporter" with a dropdown menu, "Default sample size" with a text input, "Carton Brand" with a dropdown menu, "Label" with a dropdown menu, and "Packing format" with a dropdown menu. Each field has a plus icon next to it, indicating an add or edit function.

Smart inspection interface

Easy entry

Enter new records (eg: supplier name) at any time; you don't need to pre-define options. New records can then be used in future inspections.

Special fields

Add new text boxes, note box, dropdowns, on / off switches to your inspections. Your consultant will do this for you, but you can change the config at any time.

Unlimited photos

Rapidly take and attach unlimited photos (or any **document**) to test or criteria. Great for showing suppliers and customers. Photos show on the inspection reports.

A.I. inspections

Use A.I. inspections to save time and increase consistency and reduce mistakes. Custom trained A.I. datasets optionally available (additional cost).

Multi-sample

An inspection can have 1 or more samples, users can add additional samples at will, or inspections can be programmed to require a specific quantity.

On tap share!

Share inspections & photos to users and email addresses with one tap.

Unlimited users

Your solution includes 8 concurrent user licenses, you can add an unlimited amount of additional users at any time, POA.

Bespoke quality solutions

Upgrade to the Producepak suite

Upgrade at any time to Producepak Fresh Produce / Food Service / Meat Packing business solutions at any time:

- If you need to add traceability, inventory, orders, sales, shipping, invoicing, and other features to your ProducepakQI, simply switch to a new Producepak subscription.
- The new annual subscription fee will replace the ProducepakQI subscription fee, due immediately, your account will immediately be credited with a pro-rata refund of your QC subscription (deducted from the new annual subscription fee).
- Normal project management, training, and setup fees apply to your new Producepak solution.
- Licenses from your QC subscription will be replaced by the standard user licenses that come with your chosen solution. You can buy more licenses at any time.
- Integrate with other solutions/apps and hardware using our API.
- Some features may require Producepak PH/FS/MP and are denoted with * or ** or cost extra.

Frequently asked questions

Can I have a free trial?

We can't provide this because ProducepakQI is heavily tailored to your business requirements and includes training services from a ProducepakQI consultant; without which no solution would work properly for your business.

Do you share my data?

We will never sell or share your data with any person, company, or government unless legally compelled or reasonably required to do so in the performance of our duties.

Are offline tests the same as online?

Nope, there is reduced functionality because we can't store your entire database on your phone, alerts are not sent for offline tests, you can't attach images presently, you can't add new suppliers offline, offline tests functionality is estimated to be available in Q4 2024*. In offline mode, only limited test creation is available, all settings and other features cannot be accessed in offline mode. Offline mode only available in Enterprise annual plans, and requires the Android app to be installed..

Can I deploy ProducepakQI myself?

No, deployment is by professionals that have deployed many times. Without this experience your project takes 10 X longer to implement and has low chance of success. We will not provide Producepak without managed implementation.

What if I use ProducepakQI for a fraction of the year?

ProducepakQI is a monthly subscription, upgrade or downgrade. Keep a subscription active to ensure your data is retained.

Who develops & supports ProducepakQI?

Producepak Pty Ltd PO Box 7443 Urangan QLD AU 4655.

What languages is ProducepakQI in?

The interface is available in many languages, we can add new ones as required.

What are the costs if we need changes or additions?

We are happy to build new features or modify existing ones for your company. Please ask for a quotation or use the API to add features through your I.T. department. We are unable to provide software development services for free.

What's your refund policy?

We do not provide refunds under any circumstances. It's your responsibility to perform due diligence. Your project is not a trial or test. We sell time based services; not a physical product that can be returned and resold.
